### PERSONAL SUMMARY

I am a Front End Web Developer who loves the challenge of solving complex problems with code. My past work experience in customer service focused on meeting the needs of the customer and I bring this expertise in all of my work. I am passionate about creating web applications with clean, reusable code that is accessible, responsive, and provides a great user experience.

### KEY COMPETENCIES

HTML5, CSS3, SCSS  
Javascript, jQuery, React (Hooks & Classes)  
Responsive Design, Accessibility  
REST API, Firebase  
Version Control, Git/GitHub  
Sketch & Figma  
Complex Problem Solving  
Paired and Group Styled Programming  
Time management  
Communication & Adaptability

### ACADEMIC BACKGROUND

#### Olabisi Onabanjo University

Bachelor of Science, Economics | 2008

#### Juno College of Technology

Web Development Immersive Bootcamp | 2021  
Accelerated JavaScript | 2021  
Accelerated Web Development | 2020

### RECENT PROJECTS

#### GithubJobs

React | API | CSS3 | Firebase

A React based responsive Jobs Board that allows users search for jobs based on location, job title, and term. This web application is built using seamless integration of the Lever Job API and Firebase for data storage.

#### Sun Run

React | API | SCSS | Firebase

If you are a runner like me and need to plan your daily run, this is the app for you. This React App helps you find out the time the sun rises/sets in a variety of timezones and plan your timed run accordingly.
