### RECENT PROJECTS

#### GithubJobs | React | CSS3 | API | Firebase

A React based responsive Jobs Board that allows users search for various jobs by location, job title and term. This web application is built using the Lever API and Firebase for data storage.

<https://githubjobsdreams.netlify.app/>

#### Sun Run | React | API | Firebase | SCSS

If you are a runner like me and need to plan your daily run, this is the app for you. This React App helps you find out the time the sun sets/rises in a variety of timezones and plan your timed run accordingly.

<https://arrayofsunshine.netlify.app/>

#### MiMovie | ES6 | CSS3 | API

A responsive JS Movie database App that allows users explore and discover multiple genres of movies. The web application is built using the MovieDB API
